- i. The **Claim Amount** shall be calculated based on the value of the funds actually held in the Designated Custodian account at the time specified in clause 1(a)ii.

Explanatory Note 1

The Deductible shall be calculated using the following formula

- $\text{Claim Amount} = \min[\text{Loss Amount} - (\text{Deductible} \times \text{Cover Amount}), \text{Cover Amount}]$

See the examples below for further explanation.

Example 1

- **Cover Amount:** 1,000 USDC
- **Loss Amount:** 800 USDC
- **Deductible:** 5%
- **Deductible Value:** 50 USDC
- **Claim Amount:** 750 USDC

In this scenario, the Covered Member suffered a loss of 800 USDC. The Covered Member's Deductible is 50 USDC. The Claim Amount shall be calculated as follows:

- $\text{Claim Amount} = \min[800 \text{ USDC} - (5\% \times 1,000 \text{ USDC}), 1,000 \text{ USDC}] = 750 \text{ USDC}$

Accordingly, the maximum the Covered Member may claim for in this scenario would be 750 USDC, after applying the deductible and subject to the remaining amount of the Cover Amount.

Example 2

- **Cover Amount:** 1,000 USDC
- **Loss Amount:** 1,100 USDC
- **Deductible:** 5%
- **Deductible Value:** 50 USDC
- **Claim Amount:** 1,000 USDC

In this scenario, the Covered Member suffered a loss of 1,100 USDC. The Covered Member's Deductible is 50 USDC. The Claim Amount shall be calculated as follows:

- $\text{Claim Amount} = \min[1,100 \text{ USDC} - (5\% \times 1,000 \text{ USDC}), 1,000 \text{ USDC}] = 1,000 \text{ USDC}$

Accordingly, the maximum the Covered Member may claim for in this scenario would be 1,000 USDC, after applying the deductible and subject to the remaining amount of the Cover Amount.
